**HUMIDOR**  
**GERBER**  
Handmade in Germany

**SMOKE RISES...**

*And the scent of a fine cigar fills the room -  
like a good idea*

Despite several obvious differences in personality, people like Thomas Mann, Sigmund Freud, and Winston Churchill all shared a common passion: each one of them appreciated a good cigar and celebrated the enjoyment of smoking. For them, only the best would do. And the best requires a lot of time, love, and care. Only in this way can a cigar, like a fine wine, mature to its highest level.

We develop humidors to these exacting requirements.

[ Carl Gerber 1891 ]

# *family business*

---

since more than 130 years

## **Our philosophy**

The history of Gerber, a family-owned business, reads like an exciting novel. Established over 130 years ago, the company's founder, Carl Gerber, used his status as a master carpenter, as the foundation of the company. The establishment of the first joiners' workshop in the inner city of Duisburg laid the foundation of the close relationship between the family Gerber and the city of Duisburg. From the very beginning Gerber has proved with finest craftsmanship and became a permanent fixture throughout the entire region.

During the Second World War in the course of the bombardment the joiners' workshop burnt down in 1943 up to the foundation walls. The grandson of the enterprise founder was stationed at this time far away from home in Berlin as a soldier. Because of his strong involvement to his birthplace Karl Gerber returned after his war captivity with his

Berlin woman to Duisburg. In spite of the entire destruction of the workshop the name „Gerber“ has got an excellent reputation in Duisburg. In a burnt down house Karl Gerber has set up his temporary workshop with only 500 German Reichsmark in his pocket. Starting from there he built up his new existence out of nothing. Now the company extends far beyond regional borders. Even then, competence, passion, and commitment to quality were the key factors that were eventually passed down through the generations and made the company what it is today. Despite all the changes over the years, the company's original philosophy has remained the same:

„Success and stability can only be realized with great dedication, love of profession, entrepreneurial courage, and vision.“

# History

---

## Tradition and progress in its fifth generation

### 1. generation

1883 - the 30-year-old carpenter's master Carl Gerber founds the company Gerber GmbH in the inner city of Duisburg. Shortly after follows a relocation of the company in a more modern workshop within the town

### 2. generation

1886 - Karl Gerber, the son of the company founder is born. He steps in the footprints of his father and attains the title of the carpenter's master

### 3. generation

1921 - Year of birth of the master carpenter Karl Gerber, grandchildren of the company founder. He takes over and has significantly shaped the company for many decades

### 4. generation

1944 - Karl-Heinz Gerber Senior was born. He is by today the owner of the company and manager of the Gerber GmbH

### 5. generation

1969 - Year of birth of the joiner and owner of master's degree in business administration Karl-Heinz Gerber Junior. Today he is manager and forms the future of the enterprise.

1971 - Relocation to the address „Auf der Höhe 62-64“ in Duisburg; on a total area from 9800m<sup>2</sup> the company can spread out and work.

Today the family company Gerber consists of the manufactory and the related subsidiaries Gerbotec and Gerdoor. With our affiliates, the flooring specialist Gerbotec and the important supplier for some- and fire doors Gerdoor, we cover the entire scope of the versatile interior.

In addition, our portfolio encloses the high-quality store and exhibition construction, interior design, security technology, furniture construction according by customers' specifications and the expert restoration of historical windows and doors.

The individual consulting of our customers by trained specialist personnel is of particular importance to us.

We take the time to really listen to our clients and to fulfil your individual wishes and requirements.

Our company offers a wide range of possibilities only goods "of the peg" will not be provided. Our products are made traditionally by hand. A modern and multifunctional machinery supports our specialist staff: a powerful and universal CNC-machining center and automatic edging with optical zero joint.

A special section of our furniture manufacturing is the humidor construction in which the manufactory has specialized. For Afficionados worldwide is an original Gerber humidor the perfect complement to a precious cigar treasure. One of our humidors crowns the pleasure by the perfect union between optimum cigar storage, luxurious optics and very modern equipment: From a desktop humidor up to a complete Cigar lounge – you receive unique humidors in the most different dimensions and equipment variations with us.

Together with you we design the optimum humidor for your personal collection and precisely tailored to your requirements.

Harmony, from both inside and outside, is what makes a Gerber humidor something special. We connect with the cigar smoke not only for the enjoyment, but also, to some extent, because it ties us to a sense of beauty.

Karl-Heinz Gerber jun. (5th generation) and Karl-Heinz Gerber sen. (4th generation)

## freestanding humidor

### **Handmade in Germany**

As a family tradition all Gerber humidors are hand-crafted with the “Made in Germany” stamp. We found the best way for our products to connect tradition and modernity. The humidors are handmade in a traditional way equipped with the state-of-the-art technology and instrumentation. Such as PLC, web-accessibility and data retrieval through a smartphone app make this an internationally unmistakable and unique specimen. We create wonderful pieces of furniture to make cigar storage great.

### **Individual Design and Equipment**

Our development offers a two-shell construction system with an inner cabinet made of Spanish cedar (Cedrela) and an interchangeable outer cabinet. Therefore, it is possible to customize the Ascension to best suit your needs. Allow yourself to be inspired and visit our website (<http://www.gerber-humidors.com/materials/>). Whether noble and rare wood, exquisite materials like gold and carbon, the highly shining Parapan or the mineral material Corian with his unique haptics – no wish remains unfulfilled. We are glad to advise you in the selection of the optimum materials and best types of equipment for you. With our humidors your luxury cigars are protected and presented in a perfect manner.

### **Freestanding humidor with unique design**

The CigarArt is an adaptable piece of art, well prepared for the storage of cigars. The Gerber humidor will keep your cigars safe at constant humidification. Your real treasure are visible for you and your guests in a unique manner. The doorframe of the humidor can be designed in various versions, whereby the piece of furniture will evolve into an individual and essential accessory. Please see the styles in the images on this side. From minimal beauty to pure opulence – everything is possible. Our new humidor comprises a base, a corpus and a frame. The surface finish can have a uniform design or can be consciously different. Due to the three components, there is a creative mix between different materials possible. The exquisite materials for the shape including different kind of luxury woods. The veneer sheets are composed by hand to a distinctive veneer pattern. Alternative the humidor can be lacquered in different colors.

Our new humidor CigarArt is the liaison between pleasure and art. Your pleasing treasure of cigars is well protected with our proven technology. The frame gives the humidor individuality and a certain flair like a frame for a great painting. A picture frame in an artful design for a great appearance.

# Artline

with an ornate desert door

Based to our Artline, our new model can be formed in cooperation with different artists. For it, the outside cover can be sent to an artist who can improve the surface of the humidor. By the different creation possibilities of the door and the matching frame, the humidor CigarArt is incomparably changeable. Modern and straight-line in combination with a

high-end mineral material harmonized perfectly with the work of contemporary artist or with graffiti-artists. A work-of-art makes your personal humidor to an unmistakable furniture item.

# *Glass pane*

---

For atmospheric insights

In addition to the large glass pane embedded in the door frame, one small glass pane per side can be inserted into the body. The two further glass panes optimize the presentation of the cigars and put the collection skilfully in scene.

The glass panels on the side emphasize the clear lines of the design. In combination with the warm glow of the cigar shades and the back wall lighting, the pleasing wood of the Spanish cedar gives a foretaste of the precious cigars inside the humidior. The

symmetrical arrangement of the glass panes also harmonizes with the modern design possibilities of the CigarArts. A special highlight are glass panes, which are flush-mounted in the sides. These stand out from classic designs and underline the versatility of the Gerber humidior CigarArt.

### **sterling silver & precious wood**

The eye-catching connections of metal and wood give the key its character. Timeless forms in particularly elaborate workmanship combine functionality and design. The key handle is designed to suit its use of solid precious wood, shapely he lies flattering in the hand. The fingers find support on the engraved silver ring, which playfully encompasses and holds the key in shape. Also an engraving, according to your wishes – no matter if initials, names or family coats of arms – is possible. The locking system with the spectacular designer key of the Gerber humidor CigarArt ensures a safe

storage of your cigars in every respect. According to our philosophy, only in an airtight interior, the constant humidity and thus the basis of cigar storage can be reliably controlled. Based on this conviction, we have developed a special and innovative sandwich door system for our humidors. The interior of the frame is lined with solid Cedrela and decorated on the outside in the respective outer decor. The frame door with the large glass insert has a particularly solid construction. A robust and extremely high-quality multi-point lock guarantees the airtightness of the humidor. Quality can be found in every detail of a Gerber humidor.

# Interior

With unique equipment variety

Spanish Cedar

Cigarboards

Serviceboard

C · Flex

Cigar lovers know that each cigar and its box have individual dimensions. With various movable elements, the large internal cabinet can be equipped according to customer requirements:

The C · Flex system allows cigar shelves to be divided, drawers are used for aroma separation and the removable service board is made for perfect presentation. Your collection is set in scene by mood lighting possibilities.

The interior and all its elements are made exclusively from Spanish cedar wood. Opening the humidior the complex aroma of the wood seduced; the anticipation of a beautiful cigar increases. The color of the wood is beautiful, very variable and ranges from bright orange to reddish brown.

# *Spanish cedar*

the original humidor wood

From time immemorial, the wood of Cedrela has been used to make humidors. The aromatic essence of Spanish cedar is very close to that of tobacco. There is no wood, which would be considered more appropriate to store cigars in.

Spanish cedar (botanical term “cedrela odorata”) is against the name not a conifer it is a deciduous tree. Spanish cedar does not originate from Spain as one might assume but is generally imported from Brazil and other countries of South and Central America. The aromatic tree is a relative of the real mahogany and the name is probably derived of the external appearance.

It’s not just the wonderful aroma that makes the Cedrela the perfect tree for the constructions of humidors, but it also has several other natural properties that are beneficial. The special elements in and taste of the wood protect the cigars from tobacco worms and fungus which would otherwise easily creep out of the wood and onto the cigars. The wood itself is difficult for water to saturate, but it does retain moisture for a long time and therefore has a regulating effect.

# Cigarboards

---

Cigars need air

The removable Cigarboards of the CigarArts are adjustable and tiltable according to need and taste in position and height. Due to the individually displaceable supports on which the cigar boards rest, you have the opportunity to determine all distances yourself. Give larger boxes more space or decide to use more Cigarboards. The Cigarboards are made by hand and can be reordered.

A special highlight is the flexible inclination of the boards. You can decide on every single Cigarboard whether you want to tilt it or place it horizontally in the inside cabinet of your humidor. Design the interior of the CigarArts according to your wishes!

The lighting spreads atmosphere and moves with

the Cigarboard, even if you move it. Whether horizontal or tilted, no matter what position in the inner cabinet. The concealed LED module moves with you and puts your cigar always perfectly in scene. The flexible Cigarboards have been specially developed for the storage of luxury cigars and cigar boxes. The perforated floor is an important prerequisite for the even distribution of humidity in the humidor, at the same time it forms the basis for the C · Flex system. The Cigarboards for the Humidor CigarArt are made of solid Cedrela.

# *Serviceboard*

---

Offer customers and friends something very special

## **Presentation of the cigars**

Passion in itself is something that one must always wish to share with others and which also ought to be shared. So it behaves also with the enjoyment of a classy cigar. A cigar will like to be felt and smelled, shared and discusses with a good friend. With the removable Serviceboard you have the perfect item to display your select cigars. A warm and stylish atmosphere increases the pleasure each fine cigar. Present them to your customers or friends in a

relaxed environment, in the Cigar-Lounge, or by a fireplace at home on genuine Spanish Ceder.

Our Serviceboard made from Cedrela offers a fitted recess for Fidibusse from Cedrela for the perfect smoke. The razor-sharp cigar scissors with guillotine grinding is provided if requested. Our 100% Cedrela Serviceboard, with its unique Flex dividers for separation of flavors and varieties is a must-have for every passionate aficionado.

## Mit System zur perfekten Präsentation

C • Pins

C • Parts

### Infinite combinations

The secret of our arrangement system is the combination of flexibility and the simple handling. The ventilation holes are the basis – each shelving uses the same holes – even at the Cigarboards, the drawers and for the Serviceboard. The boreholes are evenly drilled with an proved drilling scheme. For the smooth surface, they have been polished and after reworked by hand. They ensure two things: the air circulation and the possible usage of the C-Flex System across all sectors of the humidor.

The plug-in connections follows a simple but proven idea. Wood-to-wood and turned by hand the pins and planks made from *Cedrela odorata* doesn't require any additional holder. The high quality standard of material and good workmanship is maintained. By reason of the different sizes of the

elements the inner space can easily adjusted.

The varied dimensions of the cigars and his boxes are perfectly mapped in the system. You can separate the cigars after home country, variety, aroma – whichever you prefer. Cigar aging (for a longer period) enable to phases out bitter substances and ammonia. Following that the cigars are ready for the “Marriage of Cigars”. Some of our customers appreciate the new taste and aroma, if the Tabaco oil of different cigars will be mixed. If that is your idea, you can put your favored cigars with the same strength together in one space. But beware, not every cigar is suitable for cigar aging. Some of them loose there aroma and the flavor will less substantial. One rule of thumb: especially strong cigars and such ones that smells not satisfactory in a non-lit condition, can be suitable for cigar aging.

Digital humidity display

Humidifier

# High-Tech

---

Optimal conditions for the perfect pleasure

## **Humidification and dehumidification**

Cigar connoisseurs know that constant humidity is what a humidor really needs. With our integrated electronic humidification and dehumidification system, your cigars can be optimally protected in the CigarArt. The relative humidity is measured by sensitive sensors and both too high and too low values can be compensated. If the humidity is too low, moisture is distributed evenly in the humidor

with the aid of the humidifier until the setpoint set by you is reached. The CigarArt uses a high-precision cold evaporator with high humidifier performance. A fresh air valve allows the fresh air supply to be controlled manually so that the cigars are always supplied with fresh air even if the humidor is rarely opened. The supply of fresh air promotes the aromas and the maturation process of cigars.

# *Examples for Designs*

---

An eye-catcher for a lifetime

# Manufacture

diversity, refinement & individuality

Nearly no limits are set to the creation of your personal Gerber humidor. Your humidor should adapt itself optically in the furnishing or stand out from the rest? We cannot take the decision from you. However, we hope with our materials overview to stimulate your imagination. Whether noble and rare wood, excluding materials like gold and carbon, the highly shining Parapan or the mineral material Corian with his unique haptics – no wish remains unfulfilled.

If you miss your desirable material or a design in our overview, get in touch with us. We are glad about your inquiry!

## **passion to wood**

Love, passion and appreciation for wood are handed down from generation to generation and is lived. The unique raw material is worked on with craft art and traditional knowledge, so that the grown structures of the wood are emphasised and come to full effect. As a natural raw material wood is especially protection-worthy. His protection and the lastingness of his production are close to our hearts.

# Wood & Veneers

---

noble woods from all over the world

Among the things that these fine woods are known for are: a beautiful and expressive color, striking color contrasts, amazing veins, and other unique embossing effects, especially when compared to “normal” appearing wood. Other characteristics of the wood include a noticeable heft, a high-density, a special resistance to pests, rarity, and a high value. The native or exotic woods can be customized to match the furniture in your apartment or serve as a conversation piece in a room. The exclusive wood veneers create a naturally pleasing aesthetic. One refers to thin wood sheets as veneer, which are further processed for different purposes. The word veneer was borrowed in the 16th Century, from the French word “fournir” (meaning to equip or supply). It referred to the process of covering wood with fine thin wooden sheets. The veneer technique was invented in 2900 B.C. by the Egyptians. In Egypt, precious woods were rare. This forced the

Egyptians to adopt an economical processing model. Consequently, they cut the wood into thin slats. In 1922, pieces of veneered furniture were found in the grave of King Tutankhamen.

Just as no two leaves on a tree are completely identical, no two sheets of veneer share the exact same appearance either. Signs like coarse or fine grain, bird-eyes and gristles, connotations or color nuances have their origin in the growth of the tree. There are not to be looked as a mistake, but a specific feature of the natural material wood. The only guarantee for genuineness and, therefore impossible as a complaint reason. The shown patterns are only one guidance for the approximate color, pattern and structures. Deviations are possible and normal for a natural raw material.

You can find more information about the different veneers on our website: [www.gerber-humidore.de/materialien/hoelzer-furniere](http://www.gerber-humidore.de/materialien/hoelzer-furniere).

# *Paints, Lacquers & Co*

---

the perfect surface in any color

The entire spectrum of the RAL color palette of azure to vermilion is available to choose for the design of the outer shell of a Gerber humidior.

In order to achieve a perfect surface, our humidors are sanded and finished by specially trained carpenters with years of experience. Before the first coat of lacquer can be sprayed onto the humidior, the wood must be carefully pretreated. An insulating agent seals the wood pores and imperfections, so that the varnish cannot penetrate the wood. In order to achieve an even and flawless finish, up to eight

layers of lacquer are applied. The lacquers we use are comparable to those used on black pianos and are highly sensitive. Even the slightest contamination of the air such as a single particle of dust, can destroy the final appearance. The ability to apply a perfect high-gloss finish is a fine art for every painter. It is particularly challenging and very complex. The special finish, the application of the lacquer, and the final polishing require a lot of time and precision during processing.

# *Cornice*

---

Tastefully balanced

The lower edge of the glass-dome is surrounded from an inner and external cornice. The inner cornice is located under the glass. The Serviceboard, made from Spanish Ceder, is housed in the center of the cornice when the humidor is closed. The external cornice enclose the glass-dome and completes the base cabinet. The base cabinet and the external cornice of the pictured Ascension are covered with the luxury wood Cocobolo. The inner cornice is faced with a layer of HPL Laminate (High Pressure Laminate), in this example in the color turquoise.

The inner cornice is located under the glass dome and as a consequence nearby of the luxury cigars. Therefore, we only use materials that contains no lacquer or other unwanted fragrances. Alternative for HPL we could offer high-classy materials like mineral and acryl materials. Contrary to the inner space, the outer cornice can freely designed with all possible materials. Consistent to the material of the base or accented in wood, HPL, Parapan or Corian. Naturally, the whole humidor can be designed in the high tech materials.

# *Parapan*

---

Hochglanz mit tausend Reflexionen

The smallest beam of light reflects off the pristine surface of the Parapan © and makes the humidor shine. The solid colored exterior stands out due to a unique high-gloss and immediately puts the viewer under its spell. The color selection of the

durable material is almost unlimited. Especially the Ascension Parapan © wants to attract attention. It's exquisite, sophisticated, and it makes an impression in the room as a work of art. It offers the perfect cigar storage with the latest technology.

noble metals, ultra-modern plastics und mineral materials

## **Carbon**

### **the Formula One class for humidors**

In Formula One racing, only the strongest and lightest materials used to build the fastest cars. Carbon fiber is the material of the future in both motor sports, as well as for the Gerber humidor. The outer shell of the limited edition we call “Carbon” is enhanced with real carbon, manually applied by specialists in several processing steps.

The challenge is to produce, by hand, as flat of a surface as possible, which is not interrupted at the joints of the humidor. The carbon is laid out in a pattern, which is oriented at an angle of 45 degrees. This hand application requires a high level of skill, considerable time, and especially a lot of care. On the surface of the outer shell, several layers of a special lacquer are applied by a specialist (who has previously worked on adding surface carbon to a special edition Lamborghini), sanded and then cured in an oven.

The high-gloss surface shines and brings out something special during this particular application. It is a true masterpiece that will turn heads.

## **Gold**

### **elegance for eternity**

Gold is the material of royalty. No other substance is as pleasing to the eye and luxurious to behold. With this exclusive surface, a golden humidor is a real eye-catcher. A specialist carefully applies ten layers of different primers to the surface with a badger hair brush until the gold luster appears. For our golden masterpiece, hundreds of wafer-thin gold sheets of 23 carat gold double ducats are individually polished onto the humidor. The screws and hinges, which are also overlaid with gold, complete the picture of a perfect treasure chest for the finest cigars in the world. The classy furniture with an aura of luxury can be adjusted according to your wishes.
