**HUMIDOR**  
**GERBER**  
Handmade in Germany

## SMOKE RISES...

*and the scent of a fine  
cigar fills the room -  
like a good idea*

Despite several obvious differences in personality, people like Thomas Mann, Sigmund Freud, and Winston Churchill all shared a common passion: each one of them appreciated a good cigar and celebrated the enjoyment of smoking. For them, only the best would do. And the best requires a lot of time, love, and care. Only in this way can a cigar, like a fine wine, mature to its highest level.

We develop humidors to these exacting requirements.

[ Carl Gerber 1891 ]

# *family-owned company*

---

for over 130 years

## **Our philosophy**

Tradition and progress in its fifth generation

The history of Gerber, a family-owned business, reads like an exciting novel. Established over 130 years ago, the company's founder, Carl Gerber, used his status as a master carpenter, as the foundation of the company. The establishment of the first joiners' workshop in the inner city of Duisburg laid the foundation of the close relationship between the family Gerber and the city of Duisburg. From the very beginning Gerber has proved with finest craftsmanship and became a permanent fixture throughout the entire region.

During the Second World War in the course of the bombardment the joiners' workshop burnt down in 1943 up to the foundation walls. The grandson of the enterprise founder was stationed at this time far away from home in Berlin as a soldier. Because of his strong involvement to his birthplace Karl

Gerber returned after his war captivity with his Berlin woman to Duisburg. In spite of the entire destruction of the workshop the name „Gerber“ has got an excellent reputation in Duisburg. In a burnt down house Karl Gerber has set up his temporary workshop with only 500 German Reichsmark in his pocket. Starting from there he built up his new existence out of nothing. Now the company extends far beyond regional borders. Even then, competence, passion, and commitment to quality were the key factors that were eventually passed down through the generations and made the company what it is today. Despite all the changes over the years, the company's original philosophy has remained the same:

„Success and stability can only be realized with great dedication, love of profession, entrepreneurial courage, and vision.“

# History

---

## Tradition and progress in its fifth generation

### 1. generation

1883 - the 30-year-old carpenter's master Carl Gerber founds the company Gerber GmbH in the inner city of Duisburg. Shortly after follows a relocation of the company in a more modern workshop within the town

### 2. generation

1886 - Karl Gerber, the son of the company founder is born. He steps in the footprints of his father and attains the title of the carpenter's master

### 3. generation

1921 - Year of birth of the master carpenter Karl Gerber, grandchildren of the company founder. He takes over and has significantly shaped the company for many decades

### 4. generation

1944 - Karl-Heinz Gerber Senior was born. He is by today the owner of the company and manager of the Gerber GmbH

### 5. generation

1969 - Year of birth of the joiner and owner of master's degree in business administration Karl-Heinz Gerber Junior. Today he is manager and forms the future of the enterprise.

1971 - Relocation to the address „Auf der Höhe 62-64“ in Duisburg; on a total area from 9800m<sup>2</sup> the company can spread out and work.

Today the family company Gerber consists of the manufactory and the related subsidiaries Gerbotec and Gerdoor. With our affiliates, the flooring specialist Gerbotec and the important supplier for some- and fire doors Gerdoor, we cover the entire scope of the versatile interior.

In addition, our portfolio encloses the high-quality store and exhibition construction, interior design, security technology, furniture construction according by customers' specifications and the expert restoration of historical windows and doors.

The individual consulting of our customers by trained specialist personnel is of particular importance to us.

We take the time to really listen to our clients and to fulfil your individual wishes and requirements.

Our company offers a wide range of possibilities only goods "of the peg" will not be provided. Our products are made traditionally by hand. A modern and multifunctional machinery supports our specialist staff: a powerful and universal CNC-machining center and automatic edging with optical zero joint.

A special section of our furniture manufacturing is the humidor construction in which the manufactory has specialized. For Afficionados worldwide is an original Gerber humidor the perfect complement to a precious cigar treasure. One of our humidors crowns the pleasure by the perfect union between optimum cigar storage, luxurious optics and very modern equipment: From a desktop humidor up to a complete Cigar lounge – you receive unique humidors in the most different dimensions and equipment variations with us.

Together with you we design the optimum humidor for your personal collection and precisely tailored to your requirements.

Harmony, from both inside and outside, is what makes a Gerber humidor something special. We connect with the cigar smoke not only for the enjoyment, but also, to some extent, because it ties us to a sense of beauty.

Karl-Heinz Gerber jun. (5th Generation) and Karl-Heinz Gerber sen. (4th Generation)

## Freestanding cabinet humidor

### **Handmade in Germany**

As a family tradition all Gerber humidors are hand-crafted with the “Made in Germany” stamp. We found the best way for our products to connect tradition and modernity. The humidors are handmade in a traditional way equipped with the state-of-the-art technology and instrumentation. Such as PLC, web-accessibility and data retrieval through a smartphone app make this an internationally unmistakable and unique specimen. We create wonderful pieces of furniture to make cigar storage great.

### **Individual Design and Equipment**

Our development offers a two-shell construction system with an inner cabinet made of Spanish cedar (Cedrela) and an interchangeable outer cabinet. Therefore, it is possible to customize the Ascension to best suit your needs. Allow yourself to be inspired and visit our website (<http://www.gerber-humidors.com/materials/>). Whether noble and rare wood, exquisite materials like gold and carbon, the highly shining Parapan or the mineral material Corian with his unique haptics – no wish remains unfulfilled.

We are glad to advise you in the selection of the optimum materials and best types of equipment for you. With our humidors your luxury cigars are protected and presented in a perfect manner.

### **Your favorites in sight**

The Ascension model is our humidor with a sensational movably glass-cabinet. The core idea consists in the perfect presentation of the cigars with the focus for enthusiasm of collecting and savoring. By the purist character, the worth of the collection will be highlighted and adequately put in scene. The ideal surrounding for collectors favorite's. The big brother of the Ascension is there: Due to high demand, the new humidor model Ascension Large has been added to our product portfolio. The large Ascension offers more storage space and a greater glass cabinet for the presentation of noble cigar collections with proven quality. The integrated Serviceboard has been received with a sunk glass bowl for cigar segments another important feature. The popular cigar scissor with guillotine cut are also available with the Ascension Large. Exactly like the small brother, the “Large Ascension” disposes of a hydraulic glass dome, controllable with a remote control. The rated values of the relative air humidity are individually adjustable; moistening and drying out are steered electronically and taken down.

The unique design possibilities are true to the original.

# *Glass dome*

---

## Hydraulically controlled cabinet at the click of a button

The puristic looking glass perfection the timeless design of the humidor. The interaction of art and handcraft is showing in the extraordinary design and production of the glass dome. The overall appearance is modern and unique and the joining of the segments is barely seen with an eye.

With a touch of the remote, the hydraulically powered glass case rises, revealing the cigars, perfectly displayed and illuminated, a well-guarded treasure. With the cabinet is closed, the ascension is 120 cm high - when open, the high of the ascension is 158 cm.

For private customers or cigar lounge visitors the Ascension offers the unique combination of presentation and storage. In a comfortable

atmosphere, you can serve your cigars to other collectors, friends and enthusiasts by an individual way - perfect in form and design: the removable Serviceboard provides spills in a small opening made from Spanish Cedar. Furthermore, a high-quality cigar-scissor with the perfect cut in a suitable gap. The host can take out the equipped Serviceboard and enjoy with his guests the well-deserved cigars.

# *Illumination*

---

For a pleasant atmosphere

Another especially feature, implemented in the Gerber Humidor Ascension, is the lighting insight of the class cabinet. The lighting sticks are classy in design and mounted on the inner cornice under the glass vitrine. During hydraulic opening, the glass with the cornice and the lighting moves upward together. When the humidor is closed, the space under the glass is softly illuminated to put your

cigars in perspective and set it under the right light. The filigree light sticks are insensible against the humidity inside the humidor. To secure the well-protected cigars we only use UV-free light with a low radiation of heat. Together with your marvelous cigars, the humidor shines in a specifically focused lighting and makes appetite of more.

# Cornice

---

Tastefully balanced

The lower edge of the glass-dome is surrounded from an inner and external cornice. The inner cornice is located under the glass. The Serviceboard, made from Spanish Cedar, is housed in the center of the cornice when the humidor is closed. The external cornice enclose the glass-dome and completes the base cabinet. The base cabinet and the external cornice of the pictured Ascension are covered with the luxury wood Cocobolo. The inner cornice is faced with a layer of HPL Laminate (High Pressure Laminate), in this example in the color turquoise.

The inner cornice is located under the glass dome and as a consequence nearby of the luxury cigars. Therefore, we only use materials that contains no lacquer or other unwanted fragrances. Alternative for HPL we could offer high-classy materials like mineral and acryl materials. Contrary to the inner space, the outer cornice can freely designed with all possible materials. Consistent to the material of the base or accented in wood, HPL, Parapan or Corian. Naturally, the whole humidor can be designed in the high tech materials.

# *Room inside*

With a unique variety of features

Spanish Cedar wood

Cigarboards

Drawers

Serviceboard

C • Flex

In addition to the space under the glass dome, the Ascension is provided with a full functional humidor in the base. Both parts are locked airtight. The removable Cigarboards in the base of the Ascension are completely adjustable. The Cigarboards can be tilted and positioned according to demand. For customers wish the base can be equipped with drawers made from Spanish Cedar. Drawers can be the best way to sort your valuable cigars by brand and by flavor. Both alternatives, Cigarboards or drawers, are being prepared for the storage of loose cigars and boxes. The C • Flex System facilitates individual arrangement of the interior space and practical distribution of the cigars. The inner cabinet of the Humidor is lined with carefully dried Spanish Cedar (*Cedraled odorata*), complete with a perfect aroma. The traditional wood for humidors must be handle untreated. Only then, the wonderful aroma supports the breathing and maturing of the cigars. The warm color of the Spanish Cedar shines in a bright orange up to a warm red-brown.

# *Spanish Cedar wood*

---

The original wood for Humidors

The Interior of our humidors are only lined with Spanish Cedar, botanically *Cedrela odorata*. Our experience reinforces the conviction that the best wood from humidors is gained from Spanish Cedar. From time immemorial, the wood of *Cedrela* has been used to make humidors. The aromatic essence of Spanish cedar is very close to that of tobacco. There is no wood, which would be considered more appropriate to store cigars in.

Spanish cedar (botanical term “*Cedrela odorata*”) is against the name not a conifer it is a deciduous tree. Spanish cedar does not originate from Spain as one might assume but is generally imported from Brazil and other countries of South and Central America. The aromatic tree is a relative of the real mahogany and the name is probably derived of the external appearance.

The scent of the Spanish Cedar is very close to the aroma of cigars. It is a pleasant smell, a woody fragrance with a sweet-spicy note. The prominent scent supports the cigar during her aging and development. Mixed together the fragrance is wonderful and an inimitably combination. An open Humidor from Gerber seduces the senses with this special flavor of luxury wood and high-classy cigars.

The velvety fragrance increases the anticipation and enhance the enjoyment.

The wonderful aroma makes the *Cedrela* to the perfect tree for the construction of humidors. Furthermore, it also has several other natural properties that are beneficial. The special elements in and the taste of the wood makes it more resistant against tobacco worms, mould fungus and bacteria. We only use untreated wood so the material are able to saturate water very well. It does retain moisture for a long time and therefore has a regulating effect.

# *Cigarboards*

---

Ciagrs need to breathe

The removable Cigarboards of the Ascension are completely adjustable according to demand in position and height and they can be tilted. Freely adjustable beams allows individual gaps between the boards. The Cigarboards are handmade and more items can be ordered.

A special highlight is the flexible inclined position of the Cigarboards. You can decide at each one if it should be tilted or inserted horizontally. The concealed LED light will move along with the

Cigarboards and puts your cigars any time perfectly in scene and creating a wonderful atmosphere.

The flexible Cigarboards are specially designed for the storage of luxury cigars and boxes. The perforated shelves, made from Stainless steel or from Cedrela odorata, guarantees a homogenous air distribution. Firstly they provide a uniform air flow on all levels, on the other hand the perforation is the basis for our C · Flex System to partitioning the space.

# Drawers

---

Separate your exclusive

For the serious collector, the Cedrela lined drawers that can be integrated into the humidor represent the best way to sort your valuable cigars by brand and by flavor. The drawers complement the open Cigarboards which serve the visible presentation of the cigars. They are made and finished carefully by hand, completely made from Cedrela odorata. The drawer runners working with a wood-to-wood system produce in a traditional manner, smooth by hand-grinding in many steps. We use no handles or nobs for the drawers, only recessed grips for the real contact with the wonderful wood.

The dimensions of the drawers can be easily chosen and adjusted to fit the various kinds of cigars in your collection and the space available in the humidor. To keep distance to the walls is very important for the air circulation. This will be further supported with the holes in the base of the drawer. The holes are also used for the C · Parts und C · Pins, our partitioning elements. The planks and pins are made from Cedrela odorata. The drawers can be divided in smaller areas to sorting the cigars after aroma and taste. Regardless of the configuration you choose, you will still get the same great humidification.

# *Serviceboard*

---

Offer customers and friends something very special

## **Presentation of the cigars**

Passion in itself is something that one must always wish to share with others and which also ought to be shared. So it behaves also with the enjoyment of a classy cigar. A cigar will like to be felt and smelled, shared and discusses with a good friend. With the removable Serviceboard you have the perfect item to display your selected cigars.

A warm and stylish atmosphere increases the pleasure each fine cigar. Present them to your customers or friends in a relaxed environment, in the Cigar-Lounge, or by a fireplace at home on genuine Spanish Cedar. The Cigarboard is manufactured to a high standard of quality made from solid Spanish

Ceder. It flatters the eye and the fingers and it almost automatically slide it in your hands. It offers a fitted recess for Fidibusse from Cedrela for the perfect smoke. The razor-sharp cigar scissors with guillotine grinding is provided if requested. Our 100% Cedrela Serviceboard, with its unique Flex dividers for separation of flavors and varieties is a must-have for every passionate aficionado.

# *C • Flex System*

---

## A system for perfect presentation

### **Infinite combinations**

In order to keep proper track of everything in your humidor, organization is essential. For a cleverly division of the cigars inside the humidor we have designed the C-Flex System which is usable for the Cigarboards, for the drawers and for the Serviceboards of the Gerber models. With our partitioning elements, the C • Parts und C • Pins -planks and pins made from decorative Spanish Cedar- the shelves and drawers can be divided in smaller areas to sorting the cigars after aroma and taste. Infinite combinations are possible. You can fit the niches and segments perfectly to the shape of your cigars and your boxes. The efficient plug system is perfectly adjusted for the circulation holes and works without additional holders. Another example of our high demands on craftsmanship.

humidifiers

# High-Tech

---

## Optimal conditions for perfect enjoyment

### **Optimal humidity for perfect enjoyment**

No matter which model you choose, a humidor in conjunction with our integrated electronic humidification and de-humidification systems protect your cigars as effectively as possible. The corresponding cigar boards are designed such that the cigars, even if the humidor is full, are continuously exposed to a constant level of relative humidity. High-precision humidity sensors constantly measure the relative humidity inside the humidor. If the relative humidity becomes too low, an electric fan automatically engages and evenly distributes moisture inside of the humidor until the desired level is reached.

In order to control fluctuations in the relative humidity, the dehumidifying module perfectly

complements the electronic humidification of the Gerber humidor. The automatic de-humidification is controlled by an additional actuator relay and implemented through additional fans and a damper system made of stainless steel. The fans are lined with Spanish Cedar and visually match the design of the cigar cabinet.

Whether you open your humidor frequently or you leave it closed for long periods of time: neither is a problem. The combination of massive Spanish cedar, the electronic humidification and dehumidification system, the custom air flow, and the ventilated cigar boards provide the best possible conditions for a constant relative humidity at all levels. We would be happy to assist you in choosing a humidor that best fits your needs and your smoking habits.

# *Examples of Designs*

An eye-catcher for a lifetime

# Materials

Variety, refinement & individuality

Nearly no limits are set to the creation of your personal Gerber humidor. Your humidor should adapt itself optically in the furnishing or stand out from the rest? We cannot take the decision from you. However, we hope with our materials overview to stimulate your imagination. Whether noble and rare wood, excluding materials like gold and carbon, the highly shining Parapan or the mineral material Corian with his unique haptics – no wish remains unfulfilled. If you miss your desirable material or a design in our overview, get in touch with us. We are glad about your inquiry!

## Passion to wood

Love, passion and appreciation for wood are handed down from generation to generation and is lived. The unique raw material is worked on with craft art and traditional knowledge, so that the grown structures of the wood are emphasized and come to full effect. As a natural raw material wood is especially protection-worth. His protection and the lastingness of his production are close to our hearts.

# *Woods & veneers*

---

## Precious woods of the world

Among the things that these fine woods are known for are: a beautiful and expressive color, striking color contrasts, amazing veins, and other unique embossing effects, especially when compared to “normal” appearing wood. Other characteristics of the wood include a noticeable heft, a high-density, a special resistance to pests, rarity, and a high value. The native or exotic woods can be customized to match the furniture in your apartment or serve as a conversation piece in a room. The exclusive wood veneers create a naturally pleasing aesthetic. One refers to thin wood sheets as veneer, which are further processed for different purposes. The word veneer was borrowed in the 16th Century, from the French word “fournir” (meaning to equip or supply). It referred to the process of covering wood with fine thin wooden sheets. The veneer technique was invented in 2900 B.C. by the Egyptians.

In Egypt, precious woods were rare. This forced the Egyptians to adopt an economical processing model. Consequently, they cut the wood into thin slats. In 1922, pieces of veneered furniture were found in the grave of King Tutankhamen.

Just as no two leaves on a tree are completely identical, no two sheets of veneer share the exact same appearance either. Signs like coarse or fine grain, bird-eyes and gristles, connations or color nuances have their origin in the growth of the tree. There are not to be looked as a mistake, but a specific feature of the natural material wood. The only guarantee for genuineness and, therefore impossible as a complaint reason. The shown patterns are only one guidance for the approximate color, pattern and structures. Deviations are possible and normal for a natural raw material.

# *Paints, Lacquers & Co*

---

the perfect surface in any color

The entire spectrum of the RAL color palette of azure to vermilion is available to choose for the design of the outer shell of a Gerber humidor.

In order to achieve a perfect surface, our humidors are sanded and finished by specially trained carpenters with years of experience. Before the first coat of lacquer can be sprayed onto the humidor, the wood must be carefully pretreated. An insulating agent seals the wood pores and imperfections, so that the varnish cannot penetrate the wood. In order to achieve an even and flawless finish, up to eight

layers of lacquer are applied. The lacquers we use are comparable to those used on black pianos and are highly sensitive. Even the slightest contamination of the air such as a single particle of dust, can destroy the final appearance. The ability to apply a perfect high-gloss finish is a fine art for every painter. It is particularly challenging and very complex. The special finish, the application of the lacquer, and the final polishing require a lot of time and precision during processing.

# Corian

---

Noble in charisma - unique in haptics

Corian is a high-tech solid surface material that possesses the beautiful and unique elegance of a natural stone such as marble and at the same time a high degree of changeability and formability for processing. It has an incomparably attractive matt appearance, a silky surface and a unique feel. It is durable, resistant and easy to clean. The special feature of the material was taken up by us for the surface of our Humidore Ascension and Cube. The design of the Corian exterior decor

has become an integral part of our repertoire and one of the most frequent customer requests. The choice of colours for the solid surface material knows no bounds: Bright, strong, rich solid colours, delicate white and pastel shades, earthy colours, black tones, up to atmospheric dark colours. Some of the colours have interesting effects such as a grain or a noticeable grain. Only highly qualified specialist companies can process this solid surface material, Gerber is one of them.

# *Parapan*

---

High gloss with a thousand reflections

Parapan is an exquisite material made of high-gloss special acrylic. The flawless surface of the Parapan© reflects the smallest ray of light and makes the Gerber Humidor Ascension shine. The solidly coloured, light-resistant material impresses with its unique high gloss and immediately captivates the observer.

The choice of colours for this durable material is almost unlimited. The Ascension Parapan© wants to attract attention - it is exquisite, sophisticated and particularly effective in the room and also offers the perfect cigar storage thanks to the latest technology.

noble metals, ultra-modern plastics und mineral materials

## **Carbon**

### **the Formula One class for humidors**

In Formula One racing, only the strongest and lightest materials used to build the fastest cars. Carbon fiber is the material of the future in both motor sports, as well as for the Gerber humidor. The outer shell of the limited edition we call “Carbon” is enhanced with real carbon, manually applied by specialists in several processing steps.

The challenge is to produce, by hand, as flat of a surface as possible, which is not interrupted at the joints of the humidor. The carbon is laid out in a pattern, which is oriented at an angle of 45 degrees. This hand application requires a high level of skill, considerable time, and especially a lot of care. On the surface of the outer shell, several layers of a special lacquer are applied by a specialist (who has previously worked on adding surface carbon to a special edition Lamborghini), sanded and then cured in an oven.

The high-gloss surface shines and brings out something special during this particular application. It is a true masterpiece that will turn heads.

## **Gold**

### **elegance for eternity**

Gold is the material of royalty. No other substance is as pleasing to the eye and luxurious to behold. With this exclusive surface, a golden humidor is a real eye-catcher. A specialist carefully applies ten layers of different primers to the surface with a badger hair brush until the gold luster appears. For our golden masterpiece, hundreds of wafer-thin gold sheets of 23 carat gold double ducats are individually polished onto the humidor. The screws and hinges, which are also overlaid with gold, complete the picture of a perfect treasure chest for the finest cigars in the world. The classy furniture with an aura of luxury can be adjusted according to your wishes.

## custom-made humidors & cigar lounges

### **Every cabinet a single piece**

Our customers receive special individual pieces, every detail manufactured in accordance with their wishes. Our products are hand-made, equipped with high-performance technology, all to create the perfect smoking experience. Gerber humidors are valuable pieces of manufacturing and real German craftsmanship.

### **Designed and manufactured to be a perfect fit**

Send us a photo or a sketch of where you would like to place your new humidor and we will design the perfect piece, tailored exclusively for you and your needs. Gerber Humidor offers endless possibilities and we aim to fulfill every wish.

According to size of the solutions different equipment possibilities are available, designed with you in mind. Cabinets for large collections can be

equipped with drawers made from Spanish Cedar to arrange your cigars after size and flavor. The dimensions of the drawers are free adjustable and can be changed according to demand. Used in Cigar Lounges the drawers can be embellished with elegant numbering or nameplates for regular visitors. The guest can use them as a secure and hospitable place for the perfect smoke.

### **Being exceptional is our strength**

Whether you place your humidor in a small niche on a shelf or if it takes up an entire wall, the individual nature of your piece will shine as a beautiful and unique showcase. Our customer service is personally provided, professionally competent, and internationally experienced. We take the time to fully understand your needs and create one of the most striking humidors in the world.
